1. General data

Name child	Gayanovich Ethan
Date of birth	20-12-2012
Date	20-05-2020
Mother	Diana Gayanovich °15/05/1982
Father	Nico Crombez
Other children	
Trainer	Eva Wouters
Date of start and end	start: 11/03/2020, end: 12/08/2020

2. Residence arrangement children

Ethan goes every two weekends to his father.

3. Call for assistance (after the orientation module)

Wishes from the parent(s)	Wishes from the child(ren)
Mommy wants Ethan to feel safe at home and in school and she wants him to be self-confident. Mommy wants Ethan to obey her when she gives him instructions.	We don't know yet. Untill now Eva just saw Ethan at school to observe him.

The family's strengths
Mommy and Ethan are very close. Mommy wants what's best for Ethan. His well-being and his safety are the most important things in her life. Mommy does everything for Ethan and loves him very much. Mommy is a very strong woman who knows what she wants. She goes for it. In the coming period we will be investigating closely Ethans strengths.

4. Goals

4.1. Mommy and Ethan both feel safe and comfortable at home and according to the school situation.

05-08-2020 Due to the whole coronasituation, Ethan didn't have the chance yet to adjust to his new school. However the lockdown and the fact that Ethan stayed at home, gave Ethan and mommy a feeling of safety. All the stress from before was reduced and so Ethans behaviour got much better than before.

Meanwhile, Lore from Bamboe has started a guidance in the family. It's preferable that Lore takes over the guidance, because Bamboe can guide for a much longer period than De Schommel. Also, Lore doesn't have to come every week, which makes it easier to adapt the form and frequency of the guidance to the needs of the family.

4.1.1. Ethan feels self confident and mommy knows how to help establish that.

05-08-2020 The whole Coronasituation changed plans and made a bit of improvisation necessary. Eva made a few video's to explain how to increase the self-confidence of your child. Mommy watched the video's and made the homeworks or worked with the tips and tricks Eva provided. There was a videocall regularly to talk about the video's and explain a bit more. Recently, Eva restarted the houscalls.

Mommy sure knows now what she can do to increase the self-confidence of Ethan. However, a lot depends also on how things will go in the school. Maybe it can be a good idea to let Ethan go to some sort of grouptherapy to work on his self-confidence and his social skills, to make him stronger and less vulnerable. Lore from Bamboe can help to find such an organisation if needed.

4.1.2. Ethan feels safe at school and mommy is confident about his safety at school.

05-08-2020 As mentioned before, due to corona, Ethan didn't go to school except for a few days. However we did have the meeting with Inge from the CLB and Veerle from Msoc. We agreed that with the slightest problem, Inge would be contacted. If Ethan doesn't feel safe, Inge will talk to Ethan. She will also talk to mommy and to the school, but she will especially talk to Ethan. Everyone agreed that it is important to listen to what Ethan has to say. If mommy has a problem with the school, she will also contact Inge immediately. Inge can mediate and will be there for Ethan.

Despite these agreements, mommy isn't confident about the return to school. After all that has happened, she lost her faith in the system. The return to school will surely be a difficult period and will cause stress in the family. It's very important that Lore follows the situation closely so she can support mommy as much as she can.

4.1.3. Ethan obeys mommy when she gives him instructions. Mommy knows more about positive parenting.

05-08-2020 Eva made a few video's to explain positive parenting. Besides the video's there were videocalls to talk about the subject and to explain more tips and tricks. As mentioned before, due to the lock-down and the absence of stress caused by the schoolcontext, Ethans behaviour has much

approved. Both Ethan and mommy experienced less stress.

The return to the school may change this again. It's important that Lore does a close follow-up of the situation to support mommy and Ethan well.

5. Evaluation of the cooperation and satisfaction about the training

Unfortunately, the world had to deal with the Corona-crisis. Due to measures of the government, we had to proceed the guidance by videocalls instead of housecalls. It is hard working like this. Also because of the closure of the schools.

Mommy and Eva cooperated very well. Mommy trusted Eva and felt supported by her. For Eva it was a fine guidance and allways nice to work with the family. Eva was allways very welcome and both mommy and Eva communicated openly.

Mommy pointed out that it is unfortunate that there must be a housecall every week (rules Kind en Gezin). Sometimes, it's just not possible due to other appointments and the ratrace of life these days.

Also, it is very hard for mommy to switch to another guidance (Bamboe). If Eva was allowed to guide families for a period of two or more years, mommy wouldn't have to switch now. It's hard for her, to put her trust again in someone new. This might mean a few steps back in the process.

6. End of training: family situation at the end of the training

Evaluation of the family situation

As mentioned before, at the moment the family is doing very well. Ethans behaviour has approved much and now there is no stress from shool. Mommy is a very good, warm mother for Ethan. It's clear they have a tight connection, a close relationship. Mommy wants what's best for Ethan. She wants him to feel strong and self confident. It's important Ethan and mommy get good guidance when school starts again. It's also very important they get customized care. After all they have been through a lot and it is best to guide them with care.

7. Planning of further assistance

Assistance from social network

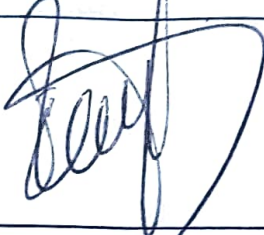

Mommy has several friends with whom she can talk and from whom she can ask help.

Assistance from professional network

- Lore (Bamboe): context guidance
- Veerle (Msoc): unfortunately Veerle is struck by a rather severe illness, so mommy will have to turn to someone who replaces Veerle. Let's hope Veerle gets well very fast and that she can return to work soon.
- Inge Vogelaers van CLB: follow up situation in school
